

Beoordeling

Coverage Agreement (word)

Pair	Cohen's kappa
All annotators	0.844 (Krippendorff's α)
Annotator 1 vs Annotator 2	0.844

Krippendorff's alpha / Cohen's kappa on a word-level reliability matrix.

LENGTH-WEIGHTED.

Span Matching (contained) — Macro F1: 0.824

Reference	Compared to	Precision	Recall	F1
Annotator 1	Annotator 2	0.890	0.766	0.824
Annotator 2	Annotator 1	0.766	0.890	0.824

Precision/Recall/F1 from matching whole spans between annotator pairs, using criterion='contained'. Not chance-corrected; reported per-pair in both directions since precision/recall are asymmetric.

material facts 074

(materiële feiten), submissions (proceshandelingen), judicial reasoning (beoordeling), and court's decision (beslissing) 075

Beslissing:

Coverage Agreement (word)

Pair	Cohen's kappa
All annotators	0.962 (Krippendorff's α)
Annotator 1 vs Annotator 2	0.962

*Krippendorff's alpha / Cohen's kappa on a word-level reliability matrix.
LENGTH-WEIGHTED.*

Span Matching (contained) — Macro F1: 0.767

Reference	Compared to	Precision	Recall	F1
Annotator 1	Annotator 2	0.966	0.636	0.767
Annotator 2	Annotator 1	0.636	0.966	0.767

Precision/Recall/F1 from matching whole spans between annotator pairs, using criterion='contained'. Not chance-corrected; reported per-pair in both directions since precision/recall are asymmetric.

Materielle feiten:

Coverage Agreement (word)

Pair	Cohen's kappa
All annotators	0.799 (Krippendorff's α)
Annotator 1 vs Annotator 2	0.799

*Krippendorff's alpha / Cohen's kappa on a word-level reliability matrix.
LENGTH-WEIGHTED.*

Span Matching (contained) — Macro F1: 0.779

Reference	Compared to	Precision	Recall	F1
Annotator 1	Annotator 2	0.796	0.763	0.779
Annotator 2	Annotator 1	0.763	0.796	0.779

Precision/Recall/F1 from matching whole spans between annotator pairs, using criterion='contained'. Not chance-corrected; reported per-pair in both directions since precision/recall are asymmetric.

Proceshandelingen:

Coverage Agreement (word)

Pair	Cohen's kappa
All annotators	0.878 (Krippendorff's α)
Annotator 1 vs Annotator 2	0.878

Krippendorff's alpha / Cohen's kappa on a word-level reliability matrix.

LENGTH-WEIGHTED.

Span Matching (contained) — Macro F1: 0.789

Reference	Compared to	Precision	Recall	F1
Annotator 1	Annotator 2	0.806	0.773	0.789
Annotator 2	Annotator 1	0.773	0.806	0.789

Precision/Recall/F1 from matching whole spans between annotator pairs, using criterion='contained'. Not chance-corrected; reported per-pair in both directions since precision/recall are asymmetric.
